PERSONAL STATEMENT

Experienced in building scalable React.js and Next.js applications using HTML, CSS, Tailwind CSS, JavaScript, and TypeScript. Skilled in improving user experience, solving complex problems, and contributing to production-grade projects. Also experienced in Unity and C# game development, working on multiplayer and mobile games with a focus on gameplay systems, UI, and performance optimization.

PROFESSIONAL EXPERIENCE

Web Developer

10/2025 – Present | Islamabad, Pakistan

Evamp & Saanga

- Developed and maintained **10+ responsive web applications** using **Next.js** and **React.js**, improving overall user experience, usability, and performance across **3+ production-level projects**.
- Built **20+ modern UI components** using **HTML5, CSS3, SASS, Tailwind CSS, JavaScript (ES6+)**, and **React.js**, reducing development time by **25%** and ensuring consistent design across all projects.
- Utilized **Git/GitHub** for version control, managing **150+ commits** across multiple projects with structured branching strategies and **pull request workflows** for clean and collaborative code management.
- Debugged and refactored legacy code across **5+ modules**, reducing production bugs by **45%**, improving code maintainability, and enhancing overall application stability and **long-term scalability**.

Unity Developer

04/2023 – 10/2025

Skyhisoft

- Contributed in developing **3+ international games**, user engagement and immersive experiences.
- Implemented game mechanics, features, and UI elements utilizing Unity and C#, leading to a **30% improvement responsiveness**.
- Collaborated with teams, including artists and designers, across **large-scale project**.
- Developed and tested cross-platform games for iOS and Android, to ensure performance optimization.
- GitHub &, Unity's Version Control (Plastic SCM) manage **200+ project commits** for project management

EDUCATION

Bachelor of Science in Computer Science

02/2019 – 03/2023

COMSATS University Islamabad.

PROJECTS

Clothing Brand

01/2026 – Present

E-Commerce Platform

- Developed a full-stack e-commerce platform using **React, Redux Toolkit**, and **Tailwind CSS**, featuring **15+ reusable UI components** and **10+ pages** with cart management, product filtering, and order tracking.
- Integrated **FakeStore REST API** via Axios with loading states and error handling, reducing code duplication by **40%** through a flexible 3-variant Card component system.
- Ensured **100% responsive design** across **3+ device sizes** (mobile, tablet, desktop) using **Tailwind CSS, CSS Grid**, and **Flexbox**, delivering a consistent and seamless user experience on all screen sizes.
- Deployed on **Vercel** with optimized build configuration and **CI/CD pipeline**, achieving **99.9% uptime**, **~20% faster** page load speeds, and fast global delivery via **CDN** for a reliable production environment.

YC Directory

05/2025 – 07/2025

Startup Search Website

- Built a full-stack directory platform using **Next.js**, **React**, and **Tailwind CSS**, **20+ reusable components**, scalable architecture.
- Implemented **GitHub authentication** via **NextAuth.js**, enabling secure, seamless login with **100% authenticated user sessions**.
- Optimized performance using **SSR and SSG** rendering strategies, reducing page load speed by **40%** for improved Core Web.
- Designed a fully **responsive, mobile-first UI** ensuring seamless compatibility across **100% of device sizes**.
- Deployed on **Vercel** with **CI/CD pipeline**, achieving **99.9% uptime**, **~40% faster** page load speeds, and seamless global delivery via **CDN**, ensuring a reliable and performative production environment for end users.

Bazoka Blast

01/2025 – 03/2025

Hyper-casual Game

- Developed a hyper-casual **projectile-based** game using **Unity** and **C#**, implementing **10+** gameplay mechanics and interactions.
- Built **slingshot/cannon** shooting systems with realistic physics, improving gameplay responsiveness and **player experience**.
- Optimized performance for **Android devices**, reducing frame drops and improving gameplay smoothness by **~30%**
- Managed **50+ version-controlled** updates using **GitHub** and **Plastic SCM** for efficient collaboration and tracking.

Dinosaur Kingdom

05/2023 – 07/2025

3D PvP Game

- Contributed to the development of a **3D multiplayer** dinosaur combat game using **Unity** and **C#**.
- Implemented **gameplay systems**, combat mechanics, and **UI features**, improving overall gameplay responsiveness by **~20%**.
- Integrated **Photon multiplayer** networking to support real-time **PvP battles** and smoother online gameplay.
- Collaborated with **cross-functional teams** including designers and artists across **large-scale** development workflows.
- Optimized game performance for **Android** and **iOS platforms**, improving stability and reducing runtime issues.
- Managed **200+ commits** and project updates using **GitHub** and **Plastic SCM** for version control and team collaboration.

SKILLS

Front-end Development — React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, TypeScript, React Router.

Styling & UI Frameworks — Tailwind CSS, SASS/SCSS, Framer Motion, Responsive Design, Shadcn.

Back-end Development — Node.js, Express.js, JSON Server, RESTful API.

State Management — Redux Toolkit, RTK Query, Context API, Zustand.

Development Tools — Git, GitHub, JIRA, npm, yarn, Postman.

Game Engines & Frameworks — Unity 3D/2D, Photon Multiplayer, Cinemachine, Timeline.

Platforms & Optimization — Android/iOS Development, Cross-Platform, Performance Optimization.

AWARDS

Academic Excellence Award

08/03/2023

Awarded by COMSATS Director for achieving **4.00/4.00 GPA** and **1st Position** in the final semester.
